

Role Description: Support Pharmacist

Pharmapod, the global leader in cloud-based software for driving efficiencies and standards, and reducing Patient Safety Incidents in the Healthcare sector, is seeking to hire a pharmacist to join its Pharmacy Team.

Reporting to the Pharmacy Director, the successful candidate will play an important role in the professional strategies for the organisation, enabling Pharmapod's vision to create actionable insights for healthcare professionals, and deliver continuous quality improvement for medication safety. They will build relationships and act as liaison between customer organisations, regulators, researchers, academic institutions, and policy makers.

The successful candidate will be experienced in completing research with an appropriate level of rigor and generating timely outputs that are meaningful for end users. They will bring the professional voice and use industry and research insights to generate 'best practice' recommendations relating to system enhancements. They will play an integral part in new idea generation for product development, through coordination of user group feedback session, active feasibility research, and market and regulator engagement.

To be successful in this role, you should have previous experience of working within a pharmacy or similar healthcare area and have experience in Quality Management and Continuous Quality Improvement. You will also have strong communication skills to cultivate solid relationships with internal and external stakeholders and be comfortable presenting to large and small audiences. You will have a strong track record in completing research and/or formal report-writing, as well as an ability to adapt your communication style based on the audience and platform.

We would like to hear from you if you are ambitious, motivated, results-driven, and enjoy working in a fast-paced team environment. Contact Pharmacy Director, Dan Burns (dan.burns@pharmapodhq.com) to apply or to find out more about this unique and exciting opportunity.
